

*What's my ring size?
Use this printable ring sizer to find out.*

(this bar should measure 3 inches)

Prepare

Print this pdf on 8.5" x 11" paper. With a ruler measure the bar centered above and make sure it equals 3 inches. If it doesn't, adjust your print settings so page scaling is set to "none".

Assemble

Cut out the ring sizer and assemble by pulling the end of the strip through the inner slot to make a ring shape.

Measure

Slide and wrap the ring sizer around the widest part of your desired finger. Once wrapped, the number closest to the arrow point is the ring size. If in between measurements, select the closest smaller whole size. Half sizes are available upon request.

In case you need another one.
